DETAILED ACTION

Claims 1-41 are currently pending.

Election/Restriction

1. Claims 1-41 are generic to a plurality of disclosed patentably distinct species comprising different species of hydrocodone formulations comprising

A different species of oral dosage forms (e.g. tablets, capsules, caplets etc.) comprising

B. different species of patentably distinct components:

“suitable controlled-release materials” (see spec. pages 13-14;

“binder material(s)” (see spec. page 14); and optionally one or more

“diluent, lubricants ... glidants” (see spec page 15) etc.

Accordingly, the possible innumerable combinations of various components of different hydrocodone pharmaceutical components having different structures, chemical/biological properties, which are capable of separate manufacture and/or use; and require different and individually burdensome manual and/or computer structure and bibliographic searches in patent/nonpatent databases. The claims, as is, contain compositions which only comprise hydrocodone as a claimed ingredient and pharmaceutical parameters (delayed release profile) which preclude a meaningful and/or complete search on the merits.

Art Unit: 1627

. Applicant is required under 35 U.S.C. 121 to elect:

A. A single disclosed species of oral dosage form AND

B. A single hydrocodone formulation capable of achieving the presently claimed pharmaceutical attributes (e.g. delayed release profile). To satisfy this election *applicant may elect an example* from the specification which specifically describes the additional components (e.g. other than hydrocodone) which meets a claimed delayed release profile. .

In order to be completely responsive, applicant MUST indicate the claims which are readable on the elected invention.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1627

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
